

**Title**

Web Developer

**Excerpt**

We're looking for a Web Developer to collaborate with our exciting, Stockholm-based client in the automotive sector.

**Text**

Our client delivers digital innovation to some of the world's highest performing automotive brands (e.g., Porsche, Lamborghini, Audi, Bentley). Beetroot is looking for a passionate product-minded web development specialist to help our client reach even greater heights.

Per our collaboration model, you will work and communicate directly with the client-side development team.

**What we're looking for**

- 2+ years working experience in web development
- Skilled in HTML, CSS, Sass, and JavaScript
- Basic understanding of PHP
- Experience evaluating designs and wireframes for potential flaws
- Team-player, goal-oriented
- Superb English

**Bonus**

- React JS
- Working understanding of GIT version control
- WebGL and web animation
- React Native, or native app development
- Laravel Framework
- You love borsch!
